7 recalls listed by Transport Canada for this model year

Other

2026301 17 Jun 2026

Issue: On certain vehicles, the immobilizer system may not meet certain requirements of Canadian regulations. Safety Risk: This small error does not affect safety. Corrective Actions: This is not a recall. Porsche has made changes to ensure that all new vehicles meet Canadian regulations.

Visual system

2025716 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to update the driver assistance system control unit software.

Structure

2024128 27 Feb 2024

Issue: On certain vehicles, the windshield and/or the rear window may not be properly attached. As a result, the front airbag(s) may not inflate properly in a crash. Safety Risk: An airbag that doesn't inflate properly could create an increased risk of injury in a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the windshield and/or rear window.

Airbag

2023571 25 Oct 2023

Issue: On certain vehicles equipped with optional full bucket seats, the seat-mounted airbags could deploy in a crash that doesn't require them to. Safety Risk: A seat-mounted airbag that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to update the airbag control unit software.

Seats and restraints

2023145 17 Mar 2023

Issue: On certain vehicles, the seat belt reminder chime may not sound to alert you that the front passenger seat belt isn't buckled. Canadian regulations require both a seat belt reminder sound and visual tell-tale when you switch the vehicle on, and the passenger isn't wearing their seat belt. Safety Risk: A seat belt warning that doesn't work correctly may not remind you to ensure that your passenger is buckled. Not wearing a seat belt can increase the risk of injury in a crash. Corrective Actions: Porsche will notify owners by mail and instruct you to take your vehicle to a dealership to reprogram the instrument cluster software.

Seats and restraints

2021485 4 Aug 2021

Issue: On certain vehicles, the passenger seat belt assemblies may contain defective automatic locking retractors (ALR). As a result, the seat belts may not properly lock to secure a child seat. Safety Risk: A seat belt that is not properly locked could increase the risk of injury in a crash. Corrective Actions: Porsche will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the seat belts. They will be replaced, if necessary.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
