3 recalls listed by Transport Canada for this model year

Visual system

2025716 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to update the driver assistance system control unit software.

Suspension

2025337 18 Jun 2025

Issue: On certain vehicles, a retaining ring on top of the suspension strut may become loose and detach. If this happens, air could leak from the spring and cause a drop in ride height. This could affect vehicle handling and stability. Safety Risk: A change in vehicle handling or a loss of stability could increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, secure the retaining ring(s).

Lights and instruments

2024339 14 Jun 2024

Issue: On certain vehicles, a software problem could cause the headlamps to become incorrectly aimed while reversing. As a result, the vehicles may not meet certain requirements of Canadian regulations. Safety Risk: Headlamps that aren't aimed correctly could cause reduced visibility and/or glare for oncoming drivers and could increase the risk of a crash. Corrective Action: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to update the central control unit software.
