§2 OBLIGATIONS [2]

cardog.app/tools/recalls/porsche/911/2001

2 recalls listed by Transport Canada for this model year

Powertrain 2001036 21 Feb 2001

On certain vehicles equipped with a manual transmission, the clutch pressure line may leak in the area of its connection with the clutch slave cylinder. This may result in loss of power assist to the steering or clutch system. If the hydraulic fluid comes in contact with hot exhaust components a fire could result. Correction: Clutch pressure line will be replaced and an additional bracket will be installed.

Fuel system 2001037 20 Feb 2001

On certain vehicles, the fuel supply line may leak due to chafing with the intake manifold and/or the fuel return line may lead due to chafing with a spring band clamp used to secure a coolant line. A fuel leak, in the presence of an ignition source, could result in a fire. Correction: All affected vehicles will have a protective sheath installed on the fuel supply line. Also, on certain vehicles, the spring band clamp will be replaced with a screw type hose clamp and installed in such a way that it can not come into contact with the fuel return line.

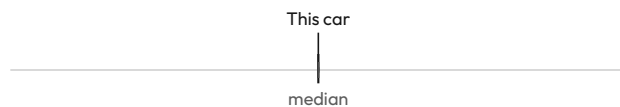

Listed for the model year, not checked against your VIN. Porsche confirms which apply.
No online lookup from Porsche · call a Porsche dealer with your VIN.

United States: 3 NHTSA records for this model year, kept apart from the Canadian listing. [3]

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
