3 recalls listed by Transport Canada for this model year

Other 2013061 22 Feb 2013

On certain vehicles, exhaust tailpipes can fracture and detach from mufflers. A tailpipe separating from the vehicle could strike another vehicle, a stationary object, or a bystander, causing property damage and/or personal injury. Correction: Dealers will replace both muffler assemblies.

Fuel system 2012102 20 Mar 2012

On certain vehicles, a fuel line quick connector could uncouple as a result of contact with a coolant pipe. Fuel leakage, in the presence of an ignition source, could result in a fire. Fuel leakage could also cause the engine to misfire and stall. Engine stalling would result in lost vehicle propulsion which, in conjunction with traffic and road condition, and the driver's reactions, could increase the risk of a crash. These issues could result in property damage and/or personal injury. Correction: Dealers will install a spacer ring to prevent contact between the fuel line quick connector and the coolant pipe.

Seats and restraints 2011293 12 Aug 2011

On certain vehicles, the seatbelt anchors were manufactured incorrectly and, as a result, may not rotate as designed. Failure of the seatbelt anchorage to restrain the occupant as intended would increase the risk of personal injury during a crash. Correction: Dealers will inspect and, if necessary, replace the seatbelt anchors.
