### 1 recall listed by Transport Canada for this model year

#### Wheels

2024646 28 Oct 2024

Issue: On certain vehicles, the center wheel lock(s) may not have been manufactured properly. As a result, the wheel lock(s) could break and cause the wheel(s) to separate from the vehicle. Note: This recall only affects certain vehicles equipped with optional central locking wheels. Safety Risk: A wheel separation could cause a loss of control and increase the risk of a crash. Additionally, a wheel that separates could create a hazard for others. Corrective Actions: To reduce the safety risk, Porsche advises not to drive your vehicle until the recall repairs are completed. Porsche will notify owners by mail and advise you to contact a dealer to arrange to have the vehicle towed to the dealership. The dealer will inspect and, if necessary, replace the center wheel lock(s).
