2 recalls listed by Transport Canada for this model year

Seats and restraints

2025221 23 Apr 2025

Issue: On certain vehicles, the third-row bench seat may be wide enough for three passengers but is only equipped with two seat belts. As a result, the seat may not meet certain requirements of Canadian regulations. Safety Risk: Not wearing a seat belt can increase the risk of injury in a crash. Corrective Actions: To reduce the safety risk, Volkswagen advises that you shouldn't transport more than two passengers in the third-row bench seat. Volkswagen will notify owners by mail and advise you to take your vehicle to a dealership to install trims on the third-row bench seat to adjust the width.

Lights and instruments

2025191 9 Apr 2025

Issue: On certain vehicles, the brake system malfunction tell-tale may be the wrong colour. Canadian regulations require certain colours for the brake system malfunction tell-tale. Safety Risk: A tell-tale that's the wrong colour could create confusion and increase the risk of a crash. Corrective Actions: Volkswagen will notify owners by mail and advise you to take your vehicle to a dealership to update the vehicle software.

Listed for the model year, not checked against your VIN. Volkswagen confirms which apply.
