2 recalls listed by Transport Canada for this model year

Lights and instruments

2020468 6 Oct 2020

Issue: On certain vehicles, the ESC warning light may not remain on if a fault was detected on the previous key cycle. Instead, the warning light does not turn on until the vehicle starts to move. Canadian regulations require that the ESC warning light must turn on when the vehicle is started (under these conditions). Note: This problem can only happen if there is a fault related to the power steering system. The power steering warning light would stay on to advise that there is a fault with the steering system. Safety Risk: This small error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has made changes to the vehicle software to correct this issue on all new vehicles.

Airbag

2016662 30 Dec 2016

Certain vehicles may have been equipped with airbag and/or pretensioner igniters that do not meet specifications. This could cause affected airbags and/or pretensioners to fail to deploy properly in the event of a crash, which could increase the risk of injury to vehicle occupants. Correction: Dealers will replace affected airbag and/or pretensioner.

Listed for the model year, not checked against your VIN. Volkswagen confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
