1 recall listed by Transport Canada for this model year

Seats and restraints

2015344 31 Jul 2015

On certain vehicles, the steering wheel clock spring could become contaminated with long hair or long fibers which may cause a displacement of the internal guide loops. When the guide loops are dragged out of position, they may apply tension to the internal flat cable and cause it to tear. Should the cable tear, the electrical connection to the driver's front airbag may be lost, causing the airbag monitoring indicator light to illuminate. Failure of the driver's airbag to deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will install a cover of a different design to help prevent clock spring contamination caused by hair or other fibers. In instances where the vehicle has an airbag light on (and diagnosis confirms the steering wheel clock spring requires replacement), dealers will install a new steering wheel clock spring.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
