Body	Coupe	Plant	Graz, Austria

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/toyota/supra/2020

6 recalls listed by Transport Canada for this model year

Visual system

2026284 9 Jun 2026

Issue: Under certain conditions, the windshield wiping system may not meet certain requirements of Canadian regulations. Safety Risk: This small error does not affect safety. Corrective Actions: This is not a recall. Toyota has made changes to ensure that all new vehicles meet Canadian regulations.

Label

2024545 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. Toyota has corrected the tire and loading information label for all new vehicles.

Brakes

2021527 24 Aug 2021

Issue: On certain vehicles, a software problem could cause the vacuum pump to be damaged during engine starting. If this happens, there could be a loss of brake assist. This can cause an increase in brake pedal effort and increase the distance needed to stop the vehicle. Safety Risk: A sudden increase in brake pedal force could lead to an increased stopping distance. This could increase the risk of a crash. Corrective Actions: Toyota will notify owners by mail and instruct you to take your vehicle to a dealer to update the engine management software.

Fuel system

2020543 12 Nov 2020

Issue: On certain vehicles, the fuel tank may not have been welded properly. As a result, the fuel tank could leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Toyota will notify owners by mail and instruct you to take your vehicle to a dealer to replace the fuel tank.

Lights and instruments

2020398 27 Aug 2020

Issue: On certain vehicles, the headlight adjustment plugs were not properly installed when the vehicle was assembled. As a result, the headlights may be adjusted horizontally. Canadian regulations do not allow for horizontal headlight adjustment unless the vehicle is equipped with a built-in aiming device. Safety Risk: Headlights that are not properly adjusted could cause reduced visibility or glare for oncoming drivers, and could increase the risk of a crash. Corrective Actions: Toyota will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the headlights. If an incorrect adjustment plug is found, it will be replaced with the correct plug.

Visual system

2019482 1 Oct 2019

Issue: On certain vehicles, the rearview camera does not return to the default settings when it turns on. This could make the rearview image difficult to see if a driver had previously adjusted the camera display brightness at or near the lowest setting, and contrast at or near the highest setting. Canadian regulations require that the rearview display returns to the default view each time the camera is turned on. Safety Risk: Reduced rear visibility could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to update the software for the rearview camera. Drivers are recommended not to adjust the display brightness at or near the lowest setting, and contrast at or near the highest setting, until this recall is completed. Update 2021/09/22: The software update for this recall has been combined with the repair for recall 2021-527.

Listed for the model year, not checked against your VIN. Toyota confirms which apply.
Check your VIN with Toyota Canada or call a Toyota dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 3 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
