cardog.app/tools/recalls/volvo/s60/2014

2 recalls listed by Transport Canada for this model year

Seats and restraints 2020298 30 Jun 2020

Issue: On certain vehicles, the flexible steel cable that attaches the seat belt to the outside of the front seats may weaken over time. As a result, the seat belt could detach. Safety Risk: A seat belt that detaches in a crash could create an increased risk of injury. Corrective Action: Volvo will notify owners by mail and instruct you to take your vehicle to a dealer to replace the front-outboard seat belt anchors.

Other 2013285 26 Aug 2013

On certain vehicles equipped with Keyless Ignition, the Central Electronic Module (CEM) may not perform as intended. When starting the engine, the amber coloured warning light in the driver information module may illuminate and there may be a message displayed such as "Alarm System Service Required" (other messages may be displayed depending on individual vehicle equipment). In addition, one or all of the following may occur: The front windshield wipers may operate continuously while the ignition is ON. The turn signals may not function. The headlight switch may not work. The high beam headlamps may not work. The battery may drain. Correction: Dealers will upgrade the CEM software.

Listed for the model year, not checked against your VIN. Volvo confirms which apply.

Check your VIN with Volvo Canada or call a Volvo dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
