## 4 recalls listed by Transport Canada for this model year

### Visual system

2025718 23 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Note: This recall replaces Transport Canada recall no. 2025-233. Vehicles that were repaired under that recall also require this repair. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Volvo will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the vehicle software. Alternatively, you may schedule an appointment to have the update performed at a Volvo dealership.

### Visual system

2025233 1 May 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Volvo will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the vehicle software. Alternatively, you may schedule an appointment to have the update performed at a Volvo dealership.

### Visual system

2022595 20 Oct 2022

Issue: On certain vehicles, a software problem could cause the top-view camera to display instead of the rearview camera image when you are reversing. Canadian regulations require the rearview image to display when reversing. Note: This recall only affects vehicles equipped with a 360-degree park assist camera. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Volvo will notify owners in writing and send a wireless over-the-air update to each vehicle. If the update cannot be completed successfully, or for vehicles without over-the-air (OTA) update capability, Volvo will instruct you to schedule an appointment to have the update performed by a dealer.

## Electrical

2022216 28 Apr 2022

Issue: On certain XC40 Recharge models, water may enter the wire harness for the accelerator pedal. If this happens, the accelerator pedal may not work properly. This problem could also cause the vehicle not to start. Safety Risk: An accelerator pedal that does not work properly could cause a loss of power to the wheels or a sudden unintended acceleration. Both could increase the risk of a crash. Corrective Actions: Volvo will notify owners by mail and instruct you to take your vehicle to a dealership to add a cable splice to the accelerator pedal wiring.

Listed for the model year, not checked against your VIN. Volvo confirms which apply.  
Check your VIN with Volvo Canada or call a Volvo dealer with your VIN.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
