5 recalls listed by Transport Canada for this model year

Visual system

2022595 20 Oct 2022

Issue: On certain vehicles, a software problem could cause the top-view camera to display instead of the rearview camera image when you are reversing. Canadian regulations require the rearview image to display when reversing. Note: This recall only affects vehicles equipped with a 360-degree park assist camera. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Volvo will notify owners in writing and send a wireless over-the-air update to each vehicle. If the update cannot be completed successfully, or for vehicles without over-the-air (OTA) update capability, Volvo will instruct you to schedule an appointment to have the update performed by a dealer.

Brakes

2020099 13 Mar 2020

Issue: On certain vehicles, the automatic emergency braking system (AEB) may not apply the brakes automatically when it detects a possible collision. In addition, the system may not warn of a potential crash with a non-moving vehicle or object. Note: The regular brake system and all other functions in the vehicle are not affected by this problem. Safety Risk: The AEB system may not provide driver warnings and apply the brakes automatically to help avoid a crash. Corrective Actions: Volvo will notify owners by mail and instruct you to take your vehicle to a dealer to update the vehicle software.

Accessories

2018618 9 Nov 2018

On certain vehicles, the Telematics and Driver Support Systems may not function as designed due to a software error. In the event of a crash, this could mean that the Emergency Assist system would not alert Volvo and provide the GPS coordinates of the vehicle. This could create a risk of no response from emergency services. Correction: Dealers will update vehicle software.

Brakes

2018441 23 Aug 2018

On certain vehicles, the brake pedal may not have been fastened correctly during manufacturing, and could result in the brake pedal moving out of position. If this were to occur, it may lead to reduced braking performance, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the brake pedal and replace it if necessary.

Seats and restraints

2018430 15 Aug 2018

On certain vehicles, the rear seatback lock strikers may not have been installed during the manufacturing process. In the event of crash, an unlocked seatback could increase the risk of injury to the seat occupants. Correction: Dealers will inspect and install rear seatback lock strikers as necessary.

Listed for the model year, not checked against your VIN. Volvo confirms which apply.
Check your VIN with Volvo Canada or call a Volvo dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 9 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 29 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
