## 2 recalls listed by Transport Canada for this model year

### Seats and restraints

2020298 30 Jun 2020

Issue: On certain vehicles, the flexible steel cable that attaches the seat belt to the outside of the front seats may weaken over time. As a result, the seat belt could detach. Safety Risk: A seat belt that detaches in a crash could create an increased risk of injury. Corrective Action: Volvo will notify owners by mail and instruct you to take your vehicle to a dealer to replace the front-outboard seat belt anchors.

### Airbag

2012082 28 Feb 2012

On certain vehicles, the wire harness under the driver and/or passenger seat may not have been properly affixed to the seat frame during vehicle assembly. As such, the harness may get caught by the amplifier (mounted under the seat) when seating position is adjusted. If this occurs, the harness connector may detach from the socket and, as a result, the corresponding airbag may not function as intended, causing the instrument panel SRS warning lamp to illuminate. Failure of a frontal airbag to deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will inspect and, if necessary, secure the wire harness to the driver and/or passenger seat frame.

Listed for the model year, not checked against your VIN. Volvo confirms which apply.

Check your VIN with Volvo Canada or call a Volvo dealer with your VIN.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
