Seats and restraints

2020298 30 Jun 2020

Issue: On certain vehicles, the flexible steel cable that attaches the seat belt to the outside of the front seats may weaken over time. As a result, the seat belt could detach. Safety Risk: A seat belt that detaches in a crash could create an increased risk of injury. Corrective Action: Volvo will notify owners by mail and instruct you to take your vehicle to a dealer to replace the front-outboard seat belt anchors.

Airbag

2012316 21 Sep 2012

On one vehicle, a defect in the supplemental restraint system (SRS) could result in an inadvertent deployment of the seatbelt pretensioner and/or side curtain airbag. Unintended seatbelt pretensioner and/or airbag deployment, in a non-warranted (non-impact) situation, could startle the driver, which could result in a vehicle crash causing property damage and/or personal injury. In some instances, inadvertent deployment could cause injuries to vehicle occupants. Correction: The SRS control unit will be replaced on the affected vehicle.
