3 recalls listed by Transport Canada for this model year

Visual system 2025718 23 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Note: This recall replaces Transport Canada recall no. 2025-233. Vehicles that were repaired under that recall also require this repair. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Volvo will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the vehicle software. Alternatively, you may schedule an appointment to have the update performed at a Volvo dealership.

Corrective Actions: Volvo will notify owners by mail and send a wireless over-the-air software update for the central electronic module. Alternatively, you may schedule an appointment to have the update performed at a Volvo dealership.
