3 recalls listed by Transport Canada for this model year

Label 2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Seats and restraints 2024390 3 Jul 2024

Issue: On certain vehicles, the connector for the driver and/or passenger-front seat belt buckle sensor(s) could fail and cause the seat airbag(s) to deploy with too much force. Note: This problem would cause the airbag warning light to display on the instrument panel or the seat belt reminder chime and warning light to stay on, even if you're buckled. Safety Risk: An airbag that deploys with too much force could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to replace the connector for the driver and/or passenger-front seat belt buckle sensor(s).

Visual system 2020145 6 Apr 2020

Issue: On certain vehicles, the rearview camera image may be displayed even after the transmission is shifted out of reverse. This could cause a possible distraction for the driver. Canadian regulations require the rearview image to turn off within 10 seconds after shifting from reverse gear. Safety Risk: A driver that is distracted could have an increased risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to update the radio software.
