2 recalls listed by Transport Canada for this model year

Lights and instruments

2024747 10 Dec 2024

Issue: On certain vehicles, the wrong bumper backup lamp assembly may have been installed. As a result, the backup lamps may be the wrong colour when the vehicle is reversing. Canadian regulations require the backup lamps to be white. Safety Risk: Backup lamps that aren't the correct colour could cause others not to recognize when a vehicle is backing up and could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the bumper backup lamp assembly.

Seats and restraints

2024390 3 Jul 2024

Issue: On certain vehicles, the connector for the driver and/or passenger-front seat belt buckle sensor(s) could fail and cause the seat airbag(s) to deploy with too much force. Note: This problem would cause the airbag warning light to display on the instrument panel or the seat belt reminder chime and warning light to stay on, even if you're buckled. Safety Risk: An airbag that deploys with too much force could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to replace the connector for the driver and/or passenger-front seat belt buckle sensor(s).

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
