3 recalls listed by Transport Canada for this model year

Label 2022708 13 Dec 2022

Issue: On certain vehicles, the airbag warning labels are located on the headliner under the sun visors. Canadian regulations require information about the airbag system to be provided on both sides of the sun visor. Safety Risk: This small error does not affect safety. Corrective Actions: This is not a recall. Maserati has made changes to ensure that all new vehicles have the airbag warning labels installed correctly.

Structure 2018294 6 Jun 2018

Certain vehicles may have incomplete welds on the front subframe due to a manufacturing error. This could cause the welds on the subframe to break, which could affect vehicle handling and increase the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect the subframe for incomplete welds and replace it as necessary.

Fuel system 2017658 21 Dec 2017

On certain vehicles, the fuel system may leak at various quick connectors due to manufacturing defects. A fuel leak in the presence of an ignition source could increase the risk of fire causing injury and/or damage to property. Correction: Dealers will install a new fuel delivery line kit.

Listed for the model year, not checked against your VIN. Maserati confirms which apply.
