3 recalls listed by Transport Canada for this model year

Steering

2013163 13 May 2013

On certain vehicles, the rear suspension tie rods (for alignment toe adjustment) may corrode and fail. This could result in a loss of vehicle control and a crash causing property damage and/or personal injury. Correction: Dealers will replace both rear suspension tie rods and perform a wheel alignment.

Lights and instruments

2012037 3 Feb 2012

On certain vehicles, a faulty printed circuit board may cause the rear tail lamp / brake lamp bulbs (either left or right side) to fail. Failure of the rear lamps may result in the following road users being unaware of the driver's intentions, as well as reducing vehicle conspicuity during hours of darkness, which could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, replace both rear tail lamp assemblies.

Suspension

2009016 19 Jan 2009

On certain vehicles, the front and rear suspension upper and lower ball joint nuts may have been incorrectly torqued during vehicle assembly. This could allow the nuts to loosen, which may result in a loss of vehicle control and a crash causing property damage, personal injury or death. Correction: Dealers will verify tightening torque of the ball joint nuts and, if necessary, replace the suspension arms, ball joints and hub carriers.
