5 recalls listed by Transport Canada for this model year

Lights and instruments 2025673 9 Dec 2025

Issue: On certain vehicles, the wiring harness for the headlamps may not have been routed properly. As result, the wiring could become damaged by contact with the wheel arch lining. If this happens, the headlamps may stop working. Safety Risk: A loss of headlamps can reduce visibility and could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the wheel arch lining. The dealer will also inspect the headlamp wiring harness and re-route and/or repair it, as necessary.

Visual system 2025533 7 Oct 2025

Issue: On certain vehicles, the radio may not have been manufactured properly and/or there could be a problem with the radio software. As a result, the rearview camera image may not display correctly or at all. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the radio. The dealer will also update the radio software, as necessary.

Label 2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Seats and restraints

2024390 3 Jul 2024

Issue: On certain vehicles, the connector for the driver and/or passenger–front seat belt buckle sensor(s) could fail and cause the seat airbag(s) to deploy with too much force. Note: This problem would cause the airbag warning light to display on the instrument panel or the seat belt reminder chime and warning light to stay on, even if you're buckled. Safety Risk: An airbag that deploys with too much force could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to replace the connector for the driver and/or passenger–front seat belt buckle sensor(s).

Label

2024379 3 Jul 2024

Issue: On certain vehicles, the tire and loading information label and/or the compliance label may list incorrect tire size and/or tire pressure information. This could lead you to inflate the tires incorrectly and/or install the wrong tires. These errors could lead to poor handling and/or a tire failure. Safety Risk: Poor handling or a tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to replace the tire and loading information label and/or the compliance label.

Listed for the model year, not checked against your VIN. Alfa Romeo confirms which apply.

Check your VIN with Mopar Canada or call a Alfa Romeo dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
