6 recalls listed by Transport Canada for this model year

Visual system

2025533 7 Oct 2025

Issue: On certain vehicles, the radio may not have been manufactured properly and/or there could be a problem with the radio software. As a result, the rearview camera image may not display correctly or at all. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the radio. The dealer will also update the radio software, as necessary.

Label

2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Seats and restraints

2024390 3 Jul 2024

Issue: On certain vehicles, the connector for the driver and/or passenger-front seat belt buckle sensor(s) could fail and cause the seat airbag(s) to deploy with too much force. Note: This problem would cause the airbag warning light to display on the instrument panel or the seat belt reminder chime and warning light to stay on, even if you're buckled. Safety Risk: An airbag that deploys with too much force could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to replace the connector for the driver and/or passenger-front seat belt buckle sensor(s).

Brakes

2023312 30 May 2023

Issue: In certain situations, the braking system could apply too much force to the brake rotors. If this happens, the brake rotors could crack and suddenly cause reduced braking. Note: This recall only affects vehicles equipped with carbon ceramic matrix brakes. Safety Risk: Reduced braking can cause an extended stopping distance and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to update the brake system module (BSM) software.

Fuel system

2021700 15 Nov 2021

Issue: On certain vehicles, the housing for the fuel line sensor could crack and leak fuel. If this happens, the engine can stall while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Additionally, a fuel leak can create the risk of a fire. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the build code on the fuel line sensor housing and replace it, as required.

Brakes

2020555 18 Nov 2020

Issue: On a small number of vehicles equipped with the carbon ceramic material (CCM) brake option, the rear brake discs could fracture. If this happens, brake performance would be reduced. Safety Risk: Reduced brake performance can cause extended stopping distances and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to replace the rear brake discs.

Listed for the model year, not checked against your VIN. Alfa Romeo confirms which apply.

Check your VIN with Mopar Canada or call a Alfa Romeo dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 6 live listings, as of 26 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 26 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
