2 recalls listed by Transport Canada for this model year

Label 2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Tires 2017122 8 Mar 2017

On certain vehicles, a fault in the tire pressure monitoring system (TPMS) could cause the vehicle to fail to display the low pressure telltale when low tire pressure is detected. An inoperative TPMS could allow underinflated tires to go unnoticed by the driver, which could affect vehicle stability and increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update vehicle software.
