4 recalls listed by Transport Canada for this model year

Brakes 2022534 21 Sep 2022

Issue: On certain vehicles, the brake reservoir fluid cap may not vent properly. As a result, the braking system could leak brake fluid. If this happens, there could be a partial or total loss of braking. Safety Risk: Reduced braking or a loss of brakes can increase the risk of a crash. Corrective Actions: Ferrari will notify owners by mail. Ferrari will send you a second notice once the repair parts are available. Ferrari advises that if the "Low Brake Fluid" warning message appears on the vehicle dashboard, you should pull off the road as soon as it is safe to do so. You should then contact Ferrari Roadside Assistance and get towed to the nearest dealer.

Fuel system 2019094 27 Feb 2019

Issue: On certain vehicles, the fuel vapour separator contains a manufacturing defect which could allow for a small fuel leak. Safety Risk: Leaking fuel, in the presence of an ignition source, creates the risk of a fire. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have fuel vapour separator replaced.

Structure 2019093 27 Feb 2019

Issue: On certain vehicles, a problem with the door lock cables could prevent the doors from being opened from the outside. Safety Risk: If the doors cannot be opened from the outside in an emergency, it may prevent access to the vehicle occupants. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have new door locks and door lock cables installed.

Airbag

2019011 10 Jan 2019

Issue: On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the passenger-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function. Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury. Corrective Action: Owners will be notified by mail and instructed to take their vehicle to a dealer to have the passenger-front airbag module replaced. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Listed for the model year, not checked against your VIN. Ferrari confirms which apply.

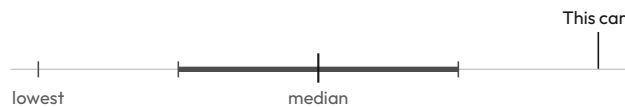

Check your VIN with Ferrari or call a Ferrari dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
