3 recalls listed by Transport Canada for this model year

Steering	2012297	3 Sep 2012
On certain vehicles, the power steering high pressure line may develop a leak. Loss of steering fluid could cause a loss of steering power assist, which may result in a crash causing property damage and/or personal injury. Also, power steering fluid leakage may contact a hot engine or exhaust component, which could result in a fire. Correction: Dealers will replace the power steering high pressure line.		
Other	2008121	10 Apr 2008
On certain vehicles, the engine can be started without the clutch pedal being depressed. Should this occur while the transmission is in gear, the vehicle can lurch forward or back, depending which gear was selected. Such unintended movement could result in property damage, or cause the vehicle to strike a bystander, potentially resulting in personal injury or death. Correction: Dealers will install a clutch pedal switch assembly.		
Suspension	2006050	16 Mar 2006
On certain vehicles, the bolted connections on the suspension's double wishbones may come loose over time or under extreme loading. This condition could lead to a reduction in vehicle stability which could result in a crash. Correction: Dealers will inspect and, if necessary, repair the double wishbone suspension.
