3 recalls listed by Transport Canada for this model year

Label 2022708 13 Dec 2022

Issue: On certain vehicles, the airbag warning labels are located on the headliner under the sun visors. Canadian regulations require information about the airbag system to be provided on both sides of the sun visor. Safety Risk: This small error does not affect safety. Corrective Actions: This is not a recall. Maserati has made changes to ensure that all new vehicles have the airbag warning labels installed correctly.

Tires 2021460 5 Jul 2021

Issue: On certain vehicles, the tire inflation pressure label lists the wrong cold tire pressure for the tires. The pressures are below what is recommended for the load limit listed. Canadian regulations require the recommended inflation pressures to be listed on the label. Safety Risk: This small error does not affect vehicle safety. The vehicles are equipped with a Tire Pressure Monitoring System (TPMS) which will turn on the warning light if the tire pressure drops below the minimum safe inflation pressure. Corrective Actions: This is not a recall. Maserati has made changes to ensure that all new vehicles have the correct tire inflation pressure on the label.

Lights and instruments 2019342 12 Jul 2019

Issue: On certain vehicles built with LED headlights and an Adaptive Front Lighting System, the headlights may not be aimed correctly. Safety Risk: Headlights that are not aimed properly could cause reduced visibility as well as glare for oncoming drivers, increasing the risk of a crash. Corrective Actions: Maserati will notify owners by mail and instruct them to take their vehicle to a dealer to adjust the headlights as necessary.
