1 recall listed by Transport Canada for this model year

Brakes

2025395 29 Jul 2025

Issue: On certain vehicles, the power supply for the fuse box could contact the front passenger-side footrest. This could cause a short circuit and lead to reduced braking. Note: This problem would cause the brake warning light to turn on and warning messages to display in the instrument cluster. Safety Risk: Reduced braking could cause extended stopping distances and increase the risk of a crash. Corrective Actions: To reduce the safety risk, Ferrari advises you not to drive your vehicle until the recall repairs are completed. Ferrari will notify owners by mail and advise you to contact a dealer to arrange for the installation of a spacer between the fuse box power supply and the passenger-side footrest.

Listed for the model year, not checked against your VIN. Ferrari confirms which apply.

Check your VIN with Ferrari or call a Ferrari dealer with your VIN.
